"CARING FOR THE DEVELOPMENTALLY DISABLED"

July 11, 1997

To whom it may concern,

I am writing to explain to you our experience with the Clean Wash Laundry Disc product.

We have 20 health care facilities in the Inland Empire. We care for developmentally disabled clients. In each of our homes we have six (6) clients. So we do a lot of laundry each day.

The benefits we have experienced after switching from regular commercial laundry soap to the laundry discs include: no smell or odor after washing; the colors maintain a bright look and the clothes are not fading; the previous laundry soap put the blue streaks on the clothes; there are no chemicals in the laundry discs that irritate the skin; and finally we save money. We estimate that our annual savings will be close to \$3,000.

We have been very impressed and pleased with this product and will continue to use it.

Sincerely,

A handwritten signature in cursive script that reads "Becky Joseph". The signature is written in black ink and is positioned above a horizontal line.
